

## 121.1515-00 Lumen - stopwatch with a luminescent dial

Order code: **0207.121151500**

Information about product price on demand

### Parameters

Stopwatch type	Adding
Serie	Lumen
Range	30 min
Graduation	1/5 s
Quantitative unit	ks

For industrial applications and especially for laboratory needs Hanhart offers two precision movement timers with luminescent dials.

As soon as the special dial is "charged" with light (approx. after 1 hour), it emits light in the dark for about 3 - 4 hours, ensuring good legibility. For this purpose no additional energy or radiant materials are used.

This useful property is obtained by means of an innovative plastic material with light-storing pigments. The functional plastic ABS case of the LUMEN models has extended protection against dust and water.

In a special production process the glass and the glass collar are moulded at the same time and firmly screwed to the case.

These timers can be naturally used classically for sports purposes.

Features:

- Case diameter: 55 mm
- Weight: 80 g
- Pinlever
- 1 jewel
