Quantitative unit k

The Newborn Airway Management Skills Trainer is a full-body newborn patient simulator designed to help participants practice and develop the skills needed to intubate infant patients. The S320 allows participants to gain experience with neonatal intubation and ventilation techniques.

## **Product features**

- Full body
- Realistic chest cavity containing realistic organs
- Fully articulating head, neck, and jaw permitting head-tilt/chin lift, jaw thrust and neck extension into the sniffing position
- Anatomically accurate mouth, tongue, airway, and esophagus designed to illustrate the profound differences between intubating an infant, a child, and an adult
- Soft neck with cricoid cartilage permits classic Sellick maneuver
- Realistic chest rise during ventilation
- · Realistic trachea, bronchi, and lungs. Observable bilateral lung expansion under positive pressure ventilation
- Airway narrows below vocal cords
- Realistic vocal cords with "fish-eye" appearance
- Airway diameter: 3.8mm
- Nasal passage permits placement of NP tube
