Parameters

Phantoms and simulators

Ultrazvukové fantomy

Quantitative unit

ks

An echolucent and contoured slab incorporating a representation of the jugular vein for teaching needle insertion under ultrasound.

Skills

- Use of ultrasound technology
- Handling ultrasound transducers
- Insertion of needles under ultrasound guidance
- Handling and management of guidelines and catheters under ultrasound

- Recognition of vessels using ultrasound

Features

- New echolucent material providing realistic ultrasound image
- Fluid volume and pressure can be changed in the vessel to represent variability in patient circulation providing various levels of difficulty for needle insertion
- Vein is:
 - self sealing for repeated use
 - rechargeable with water via a one-way valve
- Designed to be used on the bench top
- Is supplied on a robust non-slip base for safe usage

Package supplied

- 1 Ultrasound Vascular Access Slab 60531
- 1 Ultrasound Vascular Access base
- 1 10ml syringe
