

PH-3 - Angiographic CT Head Phantom ACS

Order code: **4103.PH-3**

Information about product price on demand

Parameters

Phantoms and simulators

Rentgenové fantomy

Quantitative unit

ks

The ACS head phantom is designed for image evaluation in CT angiography scanning and can be used as an educational tool for medical image interpretation. The head phantom includes a synthetic skull, cervical vertebrae (C1-C7), brain and arteries, along with arteries with contrast medium embedded in the left half of the head.

The anterior cerebral artery and middle cerebral artery are three-dimensionally disposed. Diameters of simulated arteries range from approx. 0.5 mm to 4.0 mm.

Set includes:

- 1 head phantom
- 1 carrying case
