- Developed in conjunction with David Willatt Consultant ENT Surgeon at Hope Hospital, Salford. This unique model has been designed for both cosmetic and functional Rhinoplasty courses
- The nose is the most defining feature of the face and altering its size or shape can result in a dramatic improvement in appearance.
- Rhinoplasty surgery is a common but complex surgical procedure designed to change the shape and/or the size of the nose (cosmetic rhinoplasty), or to improve the nasal airway (functional rhinoplasty). Often rhinoplasty surgery encompasses both of these elements
- Design and Construction:
 - The weighted head provides stability during practice
 - The model is supplied with a nasal insert, cartilage and cover
- Skills Demonstrated using the Manikin:
 - Cosmetic surgery
 - Straightening and improving nose structure
 - Restructuring and remodelling nose particularly broken nose

Available Supplies

- AR362 – Nasal inserts, covers and cartilages
