Quantitative unit

ks

This 5 ft. 5" (165 cm), full-body trainer combines our standard intubation head and IV arm with a non-electronic body. BLS services utilizing advanced skills, like airway maintenance and IV administration, will appreciate this unit. The addition of a casualty simulation kit to this manikin broadens its use for MCIs. Couple those options and a WMD (Weapons of Mass Destruction) or CBRNE (Chemical, Biological, Radiological, Nuclear) scenario where DECON (decontamination) processes are scheduled and you have the perfect setup for use in processing thorough decontamination stations. Water won't hurt this trainer, and you can initialize advanced life support treatment as you are flushing contaminants. No ECG features. Size: 65" x 23" x 9" (165 x 58 x 23 cm). Three-year warranty. Sh. wt. 50 lbs. (22.68 kg).
