A life size foetal head, made from a soft, tissue like material to give a very lifelike feel. The internal bony structure has realistic fontanelles, the individual bones move independently and the head can be moulded. Its lifelike properties make it less robust than 4005.ZKK240K and it should be handled as carefully as a live head. The model may also be used with 4005.ZKK488C Cervix Examination Set.
