Končetiny

ks

Natural size, made in SOMSO-Plast[®] and developed with Dr. Niels Benatar.

The model is made up of 6 parts, which can be disassembled. Natural colours are used throughout allowing the muscles, tendons, blood vessels and nerves to appear as they would in a bloodless field during surgery. Interchangeable parts include typical pathological findings in carpal tunnel syndrome, trigger finger and Dupuytren's Disease. On a stand with green base.

Height: 33 cm., width: 18 cm., depth: 18 cm., weight: 800 g.
