Quantitative unit

ks

Life-size.

According to Professor. Dr. JW Rohena, Department of Anatomy, Erlangen University.

Model is same as QS 8/318, with 4 masticatory muscles. Skull is severable to 18 parts. Masticatory muscles (Temporal muscle, masseter muscle, pterygoid muscle lateral and median) can be severable and attached back to their position.

Model shows anatomy of different masticatory muscles and their connection with temporo-mandibular joint and lower jaw. Each of 4 muscles is severable and showed in life-size.

Weight: 0,715 kg
