Parameters

Quantitative unit

ks

Basis of respiratory management Endotracheal intubation can be learned.

This model is a simulator with a lifelike texture, and various suction methods can be learned.

The suction of secretions not only in the oral/nasal cavities but also in tubes inserted via the oral cavities is possible.

Since the trachea has already been incised, suction with tracheal cannula insertion can also be performed.

Features

The head can be moved to the left and right.

Practice

Various types of suction training are possible

Suction of secretions in the oral cavity

Suction of secretions in inserted tubes

Suction of secretions in the nasal cavity

Suction of secretions in the tracheal cannula

Washing of the bronchi

Washing of the oral cavity
