Parameters

Quantitative unit

ks

Nozzle for emitting a near-laminar air stream, e.g. for experiments with the set of drag and lift objects or experiments on recoil. Mounted on a stem.

The very light air nozzle contains no moving parts and generates no spin. It spreads out the air stream from a connected fan. Air that comes out of the tubular nozzles near the plastic ring mixes with the secondary air to form an overall air stream of a large diameter. Includes a hose.

- **Air inlet:** 33 mm
- **Air outlet:** 120 mm
- **Dimensions:** 255 × 150 mm
- **Stand holder:** 10 mm

- **Weight:** approx. 350 g

Additionally required:

- 5401.U15425230 Air Flow Generator (230 V, 50 / 60 Hz)
- Stand Equipment
