The high quality set is an excellent substitute for original living specimens. The natural appearance, shimmering colours and lifelike 3D view makes working with these unique and inexpensive specimens a fascinating experience for your students. These fine specimens are not generally hunted or caught by us, but originate from legal breeding or pest control sources. Each specimen is prepared with great care before encasement in a high quality transparent acrylic block. Teaching can hardly get more fascinating and true-to-life!

Common Name	Scientific Name
