This high-quality deluxe functional elbow joint model with ligaments shows the anatomy and possible physiological movements of the human elbow joint in exceptional detail. This model clearly demonstrates abduction, anteversion, retroversion, internal and external rotation. The color of the natural-cast bones of the elbow joint is extremely realistic. The cartilage on the elbow joint surfaces is marked in blue. The elbow joint consists of a portion of the humerus, ulna and radius. Functional elbow joint mounted on a base for easy display.

Dimensions: 33 cm

Weight: 330 g
