Parameters

Quantitative unit

ks

- Tooth extraction practice can be done on 6 maxillary teeth and 6 mandibular teeth
- Anatomically shaped extraction teeth are held in place in the socket by hot-melt (heated glue) with the right amount of resistance allowing realistic extraction
- Extraction pressure, direction and feel can be experienced at a more clinically accurate level
- A more advanced practice can be done by attaching the model to a phantom or mannequin
- Repeated practice can be done by using a special hot-melt glue gun (*please inquire for more information)
- This model cannot be used with the FE articulator (prices are for jaws with a D articulator)
