A special Rock, highly appreciated by rescue teams, puts together its famous technical characteristics and a built in system that allows to fix the restraints to the board. The side handles are translucent incorporated elements, they make easy buckling-unbuckling operations for a fast and safe anchorage of the patient's restraints with carabiner. The reduced thickness allows an easy storage of the spine board.

- **Dimensions:** 442 × 65 × 1 825 mm
- **Weight:** 7,9 kg
- **Load Capacity:** 192 kg
- **Functioning temperature:** from -35 to +55 °C
