The following training skills are possible:

- Identification of fetal head position with palpable fontanelles, variable degrees of flexion and asynclitism
- General introduction to caesarean section and fetal head delivery
- Successful delivery of an impacted fetal head at caesarean section with adjustable degrees of difficulty

Features:

The Desperate Debra® simulator is highly realistic featuring a pregnant abdomen with pre-cut caesarean incision, uterus and fetal head of a birthing mother with a unique mechanism to replicate fetal head impaction.

- Palpable fontanelles in fetal head
- Variable degrees of fetal head rotation, flexion and asynclitism
- Unique mechanism to replicate fetal head impaction with variable degrees of difficulty
- Simulated pelvic bone cast from life

Includes:

- Desperate Debra® simulator
- Lubricant
- Instruction Manual
- Carrying case with wheels and handle for easy transportation
