This model allows training in differentiation of four typical breast lumps including a cancer with dimple sign. Palpable clavicle and ribs are also embedded under the soft breast tissue. Effective both for professionals and for breast-self-examination education.

Features:

- Four typical breast lumps can be differentiated by palpation: two breast cancers (cancer with dimpling sign and cancer with skin depression), fibroadenoma and mastopathy.
- Examination skills for skin dimple can be practiced.
- Palpable collarbone and rib structure are embedded.

Set includes:

- 1 breast model attached to the case
 - cancer with dimple sign
 - cancer with depression in the skin
 - fibroadenoma
 - mastopathy
- 1 talcum powder

Model with case size: 20 × 28 × 15 cm, 2 kg

Packing size: 21 × 30 × 17 cm, 2,2 kg
