Surgical Airway Management & Resuscitation Skills Lifelike training in advanced airway management skills, intubation, ventilation, CPR and emergency surgical procedures for life threatening trauma situations. Anatomically correct simulated human torso and AirSim airway facilitate training in tracheostomy, needle & surgical cricothyroidotomy, chest tube insertion, needle decompression of tension pneumothorax and more.

#### Model Features

- Realistic & durable AirSim Airway and nasal passage
- Realistic larynx with palpable cricoid landmarks, laryngeal cartilages & tracheal rings
- Audible hiss when needle is successfully inserted into 2nd intercostal space
- Easy identification of all anatomical landmarks for CPR, full head tilt with chin lift and jaw thrust, lifelike recoil during compressions
- Cost-effective & easily replaceable consumables: neck skin, larynx inserts, needle decompression inserts & chest drain inserts
- Tongue bulb can be inflated to create tongue edema providing a variance during training
- User feedback through visible chest rise

- Innovative design requires minimal maintenance & allows for easy product repairs

### **Medical Procedure Training**

- Chest tube insertion including surgical incision, blunt dissection, pleural perforation, fluid simulation & finger sweep
- Needle decompression of tension pneumothorax
- Needle and surgical cricothyroidotomy
- Percutaneous tracheostomy
- Cardio pulmonary resuscitation (CPR)
- Full use of supraglottic devices
- Endotracheal intubation with direct laryngoscopy
- Combitube insertion
- Nasogastric tube insertion
- Bag valve mask ventilation (BVM)
- Single lung isolation techniques

### **Package Contents**

- 1 USB user manual
- 1 Bottle of lubrication
- 2 Needle decompression inserts (as supplied on the manikin)
- 2 Economy torso inserts (as supplied on the manikin)
- 1 Wrap around neck skin (as supplied on the manikin)
- 5 Larynx inserts (1 supplied on the manikin and 4 spare)
- Durable carry case for easy transportation & safe storage
- Additional Parts & Accessories
- Economy torso inserts
- Trauma Difficult Airway 2
- Wrap around subcutaneous fat tissue
- Wrap around subcutaneous fat tissue with blood
- Super Saver Trauma X Training Pack
