AirSim Pierre Robin X was developed in collaboration with clinicians from Children's Hospital Los Angeles. This realistic training manikin highlights difficult airway management techniques for infants with Pierre Robin Sequence/Syndrome (PRS). AirSim® X airway is certified for over 20,000 intubation cycles.

Model Features

- Accurate representation of a pediatric patient with Pierre Robin Sequence
- Anatomically correct details for true to life medical procedure training
- Ideal for practicing airway obstruction management techniques
- Provides realistic feedback during airway management & laryngoscopy practice
- 'Real feel' skin covering for added realism
- Anatomically correct AirSim® X airway is certified for over 20,000 intubation cycles

Medical Procedure Training

- Double nasotracheal intubation
- Endotracheal tube insertion
- Bag-valve-mask (BVM) ventilation techniques
- Full range of supraglottic devices
- Direct and video laryngoscopy
