"Vinnie" Venous Insufficiency Leg is a great tool for teaching, training, competency testing and skills assessment in the care of patients with this condition. Wounds associated with venous disease and other wounds on the lower leg & foot are often extremely painful for the patient, thus adding urgency to their effective and efficient identification and treatment.

The following conditions are represented on "Vinnie" Venous Insufficiency Leg:

- Venous Ulcer
- Cellulitis
- Stasis Dermatitis
- Varicose Veins
- Hemosiderin Staining
- Vasculitis
- Lipodermatosclerosis
- Calciphylaxis
- Pyoderma Gangrenosum
- Healed Foot Ulcer
- Fungal Thickened Toenails
- Maceration
- Diabetic Ulcer
- Atrophe Blanche
- Pitting Edema
- Reticular and Telangiectasia Veins.

This model can also be used as a teaching tool and practice leg for clinicians learning about/practicing compression wrapping. An Optional Display Stand is available which permits 'Vinnie' to pivot from above the knee, providing a realistic experience in supporting the leg while practicing compression wrapping, dressing changes or identifying conditions.

Delivery without stand. Stand is not included and can be ordered separately with ref.no. 4003.R11020A.
