Our pediatric bronchoscopy training model provides doctors, clinical specialists and emergency responders an efficient way to practice pediatric airway management skills and diagnostic bronchoscopy techniques on an anatomically correct manikin based on a six-year-old child. Suitable for training in laryngoscopy, bronchoscopy, intubation, lung isolation and lung suctioning techniques. Features the AirSim® X airway.

Model Features

- Realistic feedback during airway management procedures
- AirSim® X pediatric airway & nasal passage
- Bronchi accurate down to the fourth generation to facilitate full range of bronchoscopy techniques
- True to life external & internal anatomical features for clear demonstration of video laryngoscopy
- Inflatable tongue simulates edema for advanced practice
- Missing front teeth resemble actual dentals of a six-year-old child
- 'Real feel' skin covering with lifelike texture

Medical Procedure Training

- Direct and video laryngoscopy
- Endo- & nasotracheal intubation
- Supraglottic airway device (SAD) insertion
- Bag-valve mask (BVM) ventilation
- Diagnostic & fiber optic bronchoscopy techniques
- Lung isolation techniques
- Lung suctioning

Package Contents

- 1 Carrier Case
- 1 Bottle of TruCorp® Lubrication
- 3 Child Lung Bags replicating 2 lungs & stomach
- 2 sets of adhesive pads (attachable to suction cups for increased stability if required)

Parts & accessories

- Replacement AirSim Child Bronchi X Airway
- Child Bronchi X Head Skin & Nasal Passage
- Base Plinth
- Suction Cup (Set Of 8)
