Parameters

Invest in quality with this uniquely sectioned 5-part heart model by 3B Scientific. Cast from a real human heart and didactically prepared to facilitate a better understanding of the anatomy and blood flow of the heart. It shows the cardiac valves during diastole and on the base the valves are shown in systole. A dissection through the median plane makes an easy demonstration possible.

Its attention to detail and high quality craftsmanship makes it definitely the top of the line heart model.

The following feature set makes it stand out from the crowd and a must have for any health professional:

- All of the original heart structures were successfully obtained during the time consuming and detailed casting procedure making this model highly accurate and lifelike
- 2 atria and 2 ventricles show all the normal anatomical structures of the papillary muscles and heart valves
- Uniquely dissected in the median plane to optimally demonstrate the path of the oxygenated and deoxygenated blood
- The heart model shows both the diastolic and systolic state. In the model itself the valves are shown in the diastolic state and in the detail view on the base the valves are shown in the systolic state
- The heart valves are made of elasticated plastic making them very durable
- The base displays the heart in its natural position in the human body
- Life size cast from real human heart
- Easy and fun to use magnetic assembly (5 pieces) for easy demonstrations
