Cannula, injection, puncturing - filter

Puncture, anesthesia, injections

Quantitative unit

ks

This soft stomach replica is an invaluable tool for showing how to properly insert and rotate the infusion set for insulin pumps, avoiding the 2" (5 cm) area around the navel, as well as giving many types of self-injections (including pen-style injections). Similar to the Life/form[®]

Injection Belly, but made of a material that creates a more realistic experience. The trainer has lifelike skin with what feels like real stomach tissue, along with the ability to pinch the skin. Backing keeps needles from going through. Adjustable straps allow the stomach to be attached to a manikin or human patient for simulation practice. The soft material can be punctured repeatedly without showing holes. Liquid injection is not recommended. 10" L x 6" W x 2" H. Manufactured using a quality management system certified as being in conformity with ISO 9001 and ISO 13485.
