Parameters

Quantitative unit

ks

- Features a realistic open abdominal wound with exposed intestines and 3 actively draining fistulas
- Central stomatized fistula is easily observed
- Non-stomatized and hidden fistulas add to the complexity of identifying effluent flow source and drainage management ability

- Practice employing various wound dressing materials and techniques (such as negative pressure wound therapy)
- Open any combination of the 3 fistulas to permit effluent flow
- Integral trainer base includes tray that can contain up to 700 ml of fluid
- Includes 500 ml effluent fluid bag, support rod, drainage tube, 1-quart bottle of effluent fluid concentrate, 3-way tube set with color-coded pinch clamps, and user manual
