Description

Laminar vertical airflow cabinet

Ext. dimensions (wxdxh)

719 x 500 x 780 mm

Price info

Price does not include shipping and validation

Quantitative unit pcs

Laminar vertical airflow cabinet, width 700 mm

Now, also with the timer of UV lamp operation

Laminar-flow cabinet is designed to clean the air of dust pollution in microbiological, biotechnological, and biochemical testing. The cabinet ensures sterile conditions for the protection of processed material from external impurities.

The latest model of laminar-flow cabinet K 700 is a highly popular device with a large number of users, not only pharmacists and laboratory technicians, but also in many other fields such as automotive industry, optics and data recovery from computer disks.

Technical Specifications:

Air flow

- laminar, vertical

Filters:

- Preliminary: polyamide class EU3 (G3), according to PN-EN 779
- Main: absolute HEPA (EN 1822), filtration efficiency min. 99.995% for MPPS

Microprocessor control:

- auto mode – automatically performs all activities in order to properly prepare for operation (“blowing through”, setting the flow, switching on the additional lamp)
- manual mode – the user may at any time freely control the cabinet functions (flow, fluorescent lamp, UV lamp)

The cabinet has a digital hour meter and an internal surveillance system indicating operation errors.

Standard cabinet equipment:

- additional lamp above the workspace
- UV germicidal lamp
- power socket on the cabinet housing
- hour timer of the cabinet and UV lamp operation
- worktop made of stainless steel

Transport and packing:

- Possible shipping to each country, costs of transport calculated individually
- Cardboard box with polystyrene foam protection on pallet
- Transportation dimensions – 800x850x600 (mm, WxHxD)
