This self-adhesive wound represents an arterial leg ulcer, a substance defect in the tissue of the lower leg as a result of a peripheral arterial occlusive disease (PAOD). Caused by insufficient blood and related oxygen supply the healing of wounds is inhibited any small injuries can become chronic wounds. In this moulage the necrosis of tissue is represented as extensive black areas. This large wound is perfect for adhering at the lower leg and adheres by itself. For longer use, it can be fixed with a special skin glue. All materials used in this product are dermatologically harmless.
