Parameters

Volume [l]	111
Inner dimensions (w x h x d) [mm]	540 x 530 x 370
Quantitative unit	ks

- Hot-air sterilizer - meets the criteria of a medical device
- 111-liter chamber volume
- Working temperature of from +10°C over ambient temperature up to 250°C
- Noiseless operation with a fine patented system of forced air flow in the chamber thanks to a built-in fan eliminating "cold air" area formation
- High operation comfort; precise temperature and time regulation; three preset sterilization programs
- Suitable for hot-air sterilization at health centers for laboratory purposes; potential use as an oven

- Model with a Fuzzy-Logic microprocessor control system; control elements situated on a foil keyboard, process information indicated on a LED display
- Wide range of optional equipment and accessories
- Output for a printer or PC connection
- Validation possibility (IQ , OQ)
