Quantitative unit

ks

Because of the influx of patients from the COVID-19 pandemic, CT and X-ray machines are increasingly difficult to access for diagnostic purposes. As such, lung ultrasound is one solution to minimize exposure for medical professionals.

Features Set includes:

- Four kinds of units: A-LINE, B-LINE(few), B-LINE (many), pneumonia and pleural effusion for training in the basics of lung ultrasound.
- Anatomy includes: lung, chest wall, ribs

- No special storage needed
- Suitable for training in large groups
- High durability
- Lung slide module and COVID-19 module under development

Set includes:

- Body
- 4 kinds of lung modules
- Instruction manual
- Talcum powder
- Storage case
