Master Workshop

For those who want to work with sizes of steel above the Practical range (20mm x 3mm), the more heavy duty Master Workshop works with steel sizes up to 25mm x 5mm. This makes it the perfect set for serious DIY, industrial/production applications and more advanced educational/training establishments.

Please note: The maximum working capacity stated is for Hot Rolled Mild Steel Bar and Annealed Bright Mild Steel Bar. Working beyond these limits or with material of greater hardness may reduce the operational life of the machines.

Contains:

- Master RBR Tool, with micro bender
- Master Punch/Shear Tool (c/w with interchangeable 3mm, 5mm and 6mm Punch Pins & Blocks)

- Mk 2/3 and Mk 3/3 Scroll Formers complete with Tube Forming components
- Metalcraft User Guide & Design & Ideas Booklets
- Scroll Profile Drawings & Magnetic Markers
- Plus Tape Measure.
