

Showcase - The evolution of life on Earth

Order code: **5008.KUB007**

Attractively designed wall-mounted showcase represents an evolution of life in geological periods of Paleozoic, Mesozoic and Cenozoic and at the same time represents so called leading fossils which are characteristic for these periods in our region. It is accompanied by names, diagrams and pictures. These are real fossils in the number of at least 19 pieces. Dimensions of the showcase are 100×80 cm and it is wooden with glass shelves and is protected with glass. It attaches to the wall on a massive bracket. Showcase is accompanied by educational material for teachers and by information chart. This educational tool is suitable for both basic and secondary schools. It is ideal for combination with showcase with rocks and minerals. Exhibits in showcase are of a high quality and are collection items.
