The **MODEL-med® Lucy and Lucy's Mum Instrumental Delivery Birth Simulator** is designed specifically for medical practitioners to simulate the practice of instrumental delivery with vacuum and forceps.

In collaboration with world renowned expert on vacuum delivery, Professor Aldo Vacca, the MODEL-med® Lucy and Lucy's Mum Instrumental Delivery Birth Simulator has been designed to accurately simulate the tactile experience of using vacuum. It allows the clinician to concentrate on the delivery of the head.

The shape of Lucy's head adheres accurately to the measurements Professor Vacca has taken of numerous fetal heads over many years, so that the fontanelles are accurately placed on the moulded head and can be easily felt.
