ks

The Five-Year-Old PEDI® Nursing Care Patient Simulator is designed to help participants practice and develop pediatric nursing care and resuscitation skills. The S155 includes an intubatable airway, an injection training arm, an intraosseous injection leg, and appropriate arterial/venous system to ensure participants in ALS training programs receive hands-on training.

Fully articulating

Articulating head, neck, and jaw permits head tilt/chin lift, jaw thrust, and neck extension into the “sniffing” position.

Intubatable airway

Anatomically accurate airway with cricoid cartilage permitting intubation, suctioning, and the Sellick maneuver.

Intraosseous access

Intraosseous infusion and injection system with realistic tibia bones. Allows infusion of fluids, blood and/or drugs directly into the bone marrow of the tibia.

Features

- Full Body with soft, lifelike face skin with molded hair
- Eyes can be closed or opened manually: realistic eye sockets
- Head tilt/Chin lift
- Oral/Nasal endotracheal intubation
- Oral/Nasal nasogastric intubation

- Tongue, teeth, and realistic airway
- Intraosseous infusion
- IV training arm
- Femoral vein
- Manual palpable pulses
- Carotid, Femoral, Brachial
- BVM with realistic chest rise
- CPR anatomical landmarks
- Lavage/gavage
- Intramuscular injection sites
- Simulated ear canal
- Practice gastric suctioning exercises
- Articulating head, jaw, arm, and legs
- Detachable at waist for easy storage
- Carrying bag and instruction manual
