ks

The Jaw Crusher BB 200 is used for the rapid, effective crushing and pre-crushing of medium-hard, hard, brittle and tough materials. Its variety of materials offered, including heavy-metal free steel, its efficiency and safety makes it ideal for sample preparation in laboratories and industrial plants.

Material feed size: < 90 mm

Final fineness: < 2 mm excellent crushing performance

- wear compensation with zero-point adjustment
- infinitely gap width setting
- overload protection
- wide range of materials for contamination free grinding
- no-rebound feed hopper with quick-release clamp

- brake motor with safety switch
- easy-to-clean crushing chamber
- continuous grinding
- connector for dust extraction
- maintenance- and lubricant-free sliding bearings
- suitable for integration in automatic installations
- special version for grinding semi-conductor materials
