The simulated patient monitor "Tempus LS" is an optional premium branded screen that works with the REALiTi 360 vital sign monitor and defibrillator app. It is designed to be used with the patient monitor simulation systems REALiTi Plus and REALiTi Pro by iSimulate. The patient monitor simulation of "Tempus LS" gives REALiTi 360 users the option to train patient monitoring and defibrillation with a perfectly mimicked screen of "Tempus LS" including all of its branded features and its operating interface. Instructors can easily add training scenarios or download new scenarios from the REALiTi 360 Community platform.

REALiTi 360 Premium Screens mimic the user interface of several leading patient monitor and defibrillator manufacturers. Through collaboration with popular defibrillator and monitor manufacturers, iSimulate has created hyper-realistic interfaces which look and work like the real vital sign monitors and defibrillators used at the point of care. The current and growing selection of patient monitors and defibrillators allows students to experience a significant number of monitors and defibrillators that they might encounter in their EMT or Hospital careers.

Based on individual training needs and the product configuration, users can select one or more of these Premium Display Screens for their simulation trainings.
