The PRESTAN TAKE2® Ultralite® Kit combines our most portable manikins (**two Ultralite and two Infant Ultralite**) along with two AED **UltraTrainers®** in one single collection.

- Fully compliant with current industry guidelines, including the most recent AHA Integrated Feedback Directive.
- Medium skin tone
- All PRESTAN CPR Training Manikins are Made in the USA.

The visual feedback from the CPR Feedback Piston gives students a real life feel of delivering 100-120 compressions per minute. Instructors

can monitor several students quickly and easily. When administering CPR slower than 100 compressions per minute, the red LED light will illuminate, letting the student know that they are not performing compressions fast enough. When doing compressions between 100-120 compressions per minute, the LED light will illuminate to a solid green color, letting them know that they are in the ideal compression rate range recommended by Industry Guidelines. A flashing red light signals the student to slow down when they are exceeding 120 compressions per minute.

In addition to the visual CPR Rate Monitor, students will also hear a clicker sound as the chest is pushed to the appropriate depth of 2.0 -2.4 inches allowing them to experience the true force needed to deliver real life chest compressions.

Sleep Mode/No Power	
1st Full Compression <small>(Wake mode/LED Test Mode, Cycles in sequence)</small>	
CPM* < 100	
CPM* 100 – 120	
CPM* > 120	

*CPM = Compressions per minute
