OPTIKA B-510BF4K fits into the microscope range as an innovative instrument with stunning features. It is dedicated to the fields of pathological anatomy, medical universities, haematology, cytology and veterinary medicine, and in any case to all those applications in which intensive and prolonged use may lead to operator fatigue. The camera performances and the high resolution of the screen make it possible to observe samples with a fidelity that was unimaginable until recently. In addition, it is an outstanding and cost-effective alternative to multi-head discussion microscopes.
