

YC-76L - Pharmacy Refrigerator

Order code: **2203.YC76L**

Information about product price on demand

Parameters

Device type

Refrigerator

Door

Glassed

Description_

3 police

Volume brutto

75 l

Temp. range in a cooling section

2-8°C

Quantitative unit

ks

- Intelligent control and constant temperature
- 3 sensors to promise effective performance
- Secure alarm system brings more security
- High-efficiency evaporator

- Advanced air cooling structure design

Features

- Upright medical refrigerator allow temperature setting in the range of 2°C~8°C precisely
- Equipped with China high quality famous brand compressor and Fan motor with patent
- With 2~3 high-quality steel wire adjustable shelves to adjust to any height for satisfying different requirements
- Design the inner material with Aluminum plate with spraying and external material with high-quality structure steel
- The electrical heating glass door filled with insert gas performs well in thermal insulation
- 1 cooling fan inside, working while door is closed, stopped while the door is opened
- The CFC-free polyurethane foam insulating layer is environmentally friendly
- The medical refrigerator is equipped with 3 sensors. When the primary sensor fails, the secondary sensor will be activated immediately
- Standard with build-in USB datalogger, remote alarm contact and RS485 interface for monitor system
