Parameters

Quantitative unit

ks

Various specific battery parameters, such as state of charge, are tested in different temperature ranges. These tests are performed within a safe temperature range for the battery.

Retrofits for the instruments

- MK 115/240/720
- MKF 115/240/720
- MKT 115/240/720
- MKFT 115/240/720
- KB 115/240/400/720
- KBF 240/720
- KMF 240/720/1020

Includes

- Independent safety thermal protection class 2 switched when 120°C is reached
- Temperature range limitation adjustable on the unit controller up to 110°C
- Stainless steel pressure relief damper installed in the middle with the ceiling
- Improved door locking mechanism with reinforced hinges
- Connection for inert gas
- Temperature monitoring in the test area
- CO2 extinguishing
