ks

This training aid was designed for practice in giving IVs. It permits detailed exercises in venipuncture so that the technique can be mastered on a realistic model before actually administering to patients. The students can palpate the arm, which is made of supple, resilient plastic with a human feel. The vein is located, the needle introduced, and blood is withdrawn or fluid injected. The model can be used repeatedly. Complete with blood powder and carrying tray. Three-year warranty.

Available Supplies

- PP00142 - Replacement Skin
- PP00143 - Replacement Vein
