A88 - Femoral Fracture and Hip Osteoarthritis Order code: 4004.1000175

Cena bez DPH Price with VAT

Parameters Quantitative unit 77,60 Eur 93,90 Eur

ks

This model was developed to provide patients understandable information, e.g. before surgery. It shows the right hip joint of an elderly person in half natural size. In addition, a frontal section through the femoral neck is shown in relief on the base. The model shows the femoral fractures that occur most commonly in practice as well as typical wear and tear symptoms of the hip joint (coxarthrosis or hip

osteoarthritis). The following fractures are shown:

- Medial femoral neck fracture
- Lateral femoral neck fracture
- Fracture through the trochanteric region (pertrochanteric femoral fracture)
- Fracture below the trochanters (subtrochanteric femoral fracture)
- Femoral shaft fracture
- Femoral head fracture
- Fracture of the greater trochanter
- Fracture or avulsion of the lesser trochanter (avulsion fracture of the lesser trochanter)

Mounted on base.
