Construction

Adult manikin

Quantitative unit

ks

These adult manikins are great trainers for introductory as well as advanced students. Manikins simulate nonanesthetized patients for practicing intubation, ventilation, suction, and CPR techniques.

Realistic anatomy and landmarks including teeth, tongue, oral and nasal pharynx, larynx, epiglottis, arytenoids, false cords, true vocal cords, trachea, lungs, esophagus, and stomach. The manikins allow you to practice oral, digital, and nasal intubation, as well as E.T., E.O.A., P.T.L., L.M.A., E.G.T.A., and Combitube® and KING System insertion. Suction techniques and proper cuff inflation may also be practiced and evaluated. Applying pressure to the cricoid cartilage changes the position of the trachea and closes the esophagus, allowing realistic practice of the Sellick maneuver. Manikins include hard travel/storage case.

Quality Features:

- Bifurcated lungs
- Head with durable, one-piece construction
