The Weighted Patient Care Manikin is designed to meet the needs of hospitals, nursing homes, and educational facilities in training primary patient care. Made of durable cast-vinyl over a steel cable frame, the lifesize manikin has fully articulated limbs and torso for flexibility. Offers training opportunities in patient handling and transfer; correct positioning in bed, wheelchair, on bedpan, commode, or other hospital equipment. Patient-sensitive bathing techniques and general hygiene procedures are facilitated by the manikin's accurate, interchangeable male-female genitalia and smooth, washable surface. A removable wig permits shampooing. Vinyl skin easily accommodates wound mouldages for teaching care of decubitus ulcers and realism in changing surgical dressings or practicing bandaging. This manikin is weighted to 105 lbs. to provide added realism to patient care procedures.
