Complete set of equipment for demonstrating laws of leverage and for experiments on equilibrium. Consists of a retort stand to which is attached a lever mounted on ball bearings with three rows of holes for adjusting the axis of rotation or for suspending weights, red and white block scale with pointer for accurate display of equilibrium state. Can also be used to model balance scales. Includes set of weights 10 × 50 g.

- **Length of lever:** 1 m
- **Mass of lever:** 0,458 kg
- **Number of holes:** 21
- **Separation of holes:** 50 mm
