Apparatus for demonstrating buoyancy of fluids, consisting of a flat-ground glass tube and a metal disc with rubber covering to form a base plate to which a long string is attached.

The base plate makes a watertight connection with the glass tube and when both are immersed in water, the plate does not sink because buoyancy keeps it pushed up against the tube.

- **Glass tube:** 200 × 28 mm dia.
- **Metal disc:** 2 × 42 mm dia.
- **Length of string:** 35 cm
