This model of the AIDS-Virus, enlarged millions of times, shows the outer lipid membrane with protein structures, and the internal nucleus which contains the viral hereditary matter (RNA). The nucleus is removable and condoms can be put underneath to provide a message regarding measures to take in protecting against HIV. No sex education course is complete without talking about HIV, the deadly sexually transmitted disease. The AIDS virus is mounted on base for easy display.

- **Dimensions:** 18 × 13 × 13 cm
