This life size deluxe functional shoulder joint model with ligaments shows the anatomy and possible physiological movements of the shoulder joint in exceptional detail. Clearly demonstrate abduction, anteversion, retroversion, internal and external rotation with this high quality shoulder model.

The color of the natural-cast bones in this shoulder model is extremely realistic. The cartilage on the joint surfaces is marked in blue. The shoulder joint model consists of scapula, clavical and a portion of the humerus. Mounted on a base for easy display in the classroom or doctors' office.

Dimensions: 22 cm

Weight: 400 g
