At 15 times life-size, this 3-part human ear is suitable for museums and special collections as well as large lecture halls and conferences. The giant ear represents the outer, middle and inner ear. The auditory ossicles and the labyrinth with cochlea and vestibulocochlear nerve can be removed from the ear and studied in detail.

World's largest ear on base.

Measurements: 130 × 120 × 60 cm

Weight: 52 kg
