Quantitative unit

ks

This model simulates an average full-term fetus. Made of soft and durable cloth. The body is flexible to show all presentations and positions possible during human birth.

*Measurements: 41 × 23 × 12 cm*

*Weight: 400 g*

#### Options and Replacements:

- **W43039 - Placenta and Umbilical Cord**

The amniotic membrane allows you to show the foetal model inside the sac. The snap-on umbilical cord clearly shows the vein and arteries and a convenient drawstring closes the sac. Both amniotic and chorionic membranes are detailed accurately in two colours.

- **W43040 - Pelvic Model**

Made of flexible cloth, this pelvic model shows how the different pelvic shapes affect pregnancy, labour and birth.
