Parameters

Accessories and aids

Masky

The transparent Eco B-life face masks are ideal for use with all types of manual and automatic resuscitators or for inhalation therapy. The structure is modelled anatomically and ergonomically to guarantee a perfect fit on the patient's face and an optimum grip for the operator.

Transparent shell

Allows inspection:

- if the patient bleeds from the mouth or nose
- if the patient starts to vomit
- if the patient starts to sweat spontaneously (the facial mask steams up)
- of the colour of the patients lips

Cushion

The cushion is made of rubber and is autoclavable with rubber cycle.
