Laryngoskopy

If you are an intubation professional, or if you make constant use of the laryngoscope, you will be looking for a product that adapts well to the body, has an optimal retention, is lightweight yet robust but above all lasts a long time. LSK 5 is your new holster constructed with a special thermoformed triple layer that contains a laryngoscope set. It is a compact and professional way to confront advanced reanimations. With a zip closure it characterizes itself for a robust elastic loop fixed to the posterior part; a flexibility which will allow for it to be used both as a case and a holster.

LSK 5 contains:

- a conventional light adult handle
- three Macintosh blades
- two pairs of latex gloves

Also available in fibre-optic version.

- **Dimensions:** 135 × 50 × 210 mm
- **Weight complete:** 672 g
